Exploring Climate Solutions Webinar Series

Brought to you by the Governor's Council on Climate Change (GC3)

The GC3'S **Exploring Climate Solutions** webinar series explores innovative and successful climate change solutions across Connecticut and the nation. The series provides you with first-hand accounts of high-profile municipal climate programs, climate initiatives in the corporate world, greenhouse gas reporting frameworks, statewide sustainability programs, and low-carbon fuel initiatives.

In our upcoming **November 24th lunchtime webinar**, participants will learn about the **Regulatory Assistance Project**. The Regulatory Assistance Project (RAP) is an independent and nonpartisan team of experts primarily composed of former air and power regulators. RAP's team has firsthand knowledge of the constraints and challenges that regulators face and advises public officials on regulatory and utility policies. The organization's strategy focuses on increased investment in cost-effective energy efficiency, integration of energy and environmental regulation, and establishing policies and regulations that effectively address climate change. This webinar will provide a review on how RAP helps energy and air regulators transition to clean, reliable, and cost-effective energy resources.

Please join us to learn more about this innovative initiative by registering [here](#).
